**NOTE:** This reference list contains only some of the completed painting/ waterproofing projects Glendale has performed since 1985. These painting, waterproofing, projects were valued between \$10,000 and \$2,700,000. This is a partial list only as a complete list would bore the reader. This list contains both Rehab/ Repaint projects as well as New Construction Projects.

There are over 1000 additional projects available **upon request**. The omission of these was for ease of review only. Intent of this resume is to show the geographical area of projects we perform and types of work we do. You can request the information by calling our office or emailing us at [sales@glendalepainting.com](mailto:sales@glendalepainting.com).

Please excuse the lack of contact information. Considering the age of some of the projects as well as the privacy of the association presidents and others, we exclude the information to limit reader frustration. We feel the best approach is, for you, the potential customer, to select the projects on this list you are interested in and let us know. We will then gladly provide you with the most recent contact information we have on file. If the phone number is a personal residence, we will call the individual and get permission to provide you with their number. Alternatively, we may have a letter of recommendation on file for some of the project(s) you may be interested in.

We are sorry for any inconvenience, but we consider the need to offer the most current information, and the respect of our client's privacy, to be very important. We are confident you would appreciate the same courtesy extended to protect your privacy. We also wish to prevent any frustration you may encounter trying to contact old disconnected phone numbers.

Thank You for your understanding.
