To Whom It May Concern:

I have had the distinct pleasure to work with the Glendale Painting Company over the past eight years and have used them on multiple projects. I have also recommended them for many other projects. I find them to be very knowledgeable, professional, and they stand behind their work.

Our most recent accomplishment together was completed last month; a 6-story building located on Clearwater beach. This job required extensive concrete and rebar remediation, multiple deck and joint repairs, including repairs to structural supporting columns, and stucco repairs along with a complete waterproofing paint job. Their ability to handle all these types of repairs along with the painting work was paramount, not only to me, but also to the Home Owners Association for two reasons.

1. It kept the scope of work under one company
2. It allowed the schedule to stay on track.

The project was completed on time and with complete satisfaction by the association.

Over the past 28 years I have been involved in building over 3,600 condominium homes in 15 different communities, the detail of which I have attached. With this experience behind me, I understand how important it is to use only qualified and experienced companies when it comes to multi-story work, especially when it involves repairs and waterproofing. For this reason I would strongly recommend Glendale Painting, and suggest that you give them the opportunity to show you the professionalism I have experienced with them.

Regards,
